TITLE : CYCLONE VACUUM CLEANER

ABSTRACT : PROBLEM TO BE SOLVED: To provide a cyclone vacuum cleaner securely mounting a filter part.

SOLUTION: The cyclone vacuum cleaner comprises a cleaner body provided with a cyclone dust box detachably provided and a built-in electric fan and a suction gear body connected to the cleaner body. The cyclone dust box comprises a dust box body, an upper cover part airtightly fixed onto an opening edge part of the dust box body and the filter part housed inside. A flange part extending in a radial direction of the filter part is interposed between an upper end flange part of the dust box body and the upper cover part.
